Spektra®

The **EclFresnel** CT+ XLIP stands out as a bright IP65-rated Fresnel hard source, crafted to replace traditional 5K Tungsten and 2.5K HMI lighting in film sets and large-scale indoor and outdoor setups. At the heart of this fixture is a robust 1500W (driven @1200 W) LED source, featuring 6 color emitters.
Its design with integrated power supply simplifies installation and wiring for both on-location use and permanent installations.
EclFresnel CT+ XLIP boasts a 300mm (12 inches) glass Fresnel lens, offering an impressive zoom range from 10° to 90° and 44.000 fixture lumens. This design maintains high efficiency even at narrow beam angles, ensuring a bright output at long throw projection.
Powered by Spektra Os, this luminaire guarantees light consistency, delivering a higher luminous flux across colors and whites. This results in a broader color space and a richer light spectrum, achieving exceptional values in CRI, TLCI, SSI, and TM30 indices, meeting the highest professional lighting requirements.
Enhanced with a more powerful processing unit, the **EclFresnel** CT+ range offers an unparalleled user experience. It provides refined control over light and color, complemented by more intuitive standalone operations. This is achieved through a larger display, backlit encoders, and advanced connectivity options, both wired and wireless.
EclFresnel CT+ also operates silently, making it an essential, durable workhorse for large film sets, theaters, and studio applications.
